

Please stop NAB's petition 04-160. I am a subscriber to satelllite radio, and feel that since I pay for the service, I should be able to recieve any and all content available. This includes locally oriented material. AM stations are flakey, and fade in and out; and FM has yet to supply traffic on a frequent enough basis. I want to be able to tune to a channel and recieve traffice and weather instantly, and not have to listen to ten minutes of inane rambling by overpaid dim wits.
